

# Results of the pre-workshop questionnaire: Auxiliaries management

Barcelona User Forum  
8 November 2017

Yannick Bousse, UITP

Horizon 2020  
Programme

Q34 - How does your country or city define a clean bus?

- Electric (x6)
- CNG (x4)
- Hybrid (x4)
- Euro VI (x2)
- Fuel cell
- BioCNG
- LNG

Q34 – Is auxiliary power consumption included in the definition?

- No (x7)
- Yes (x2) (Italy)

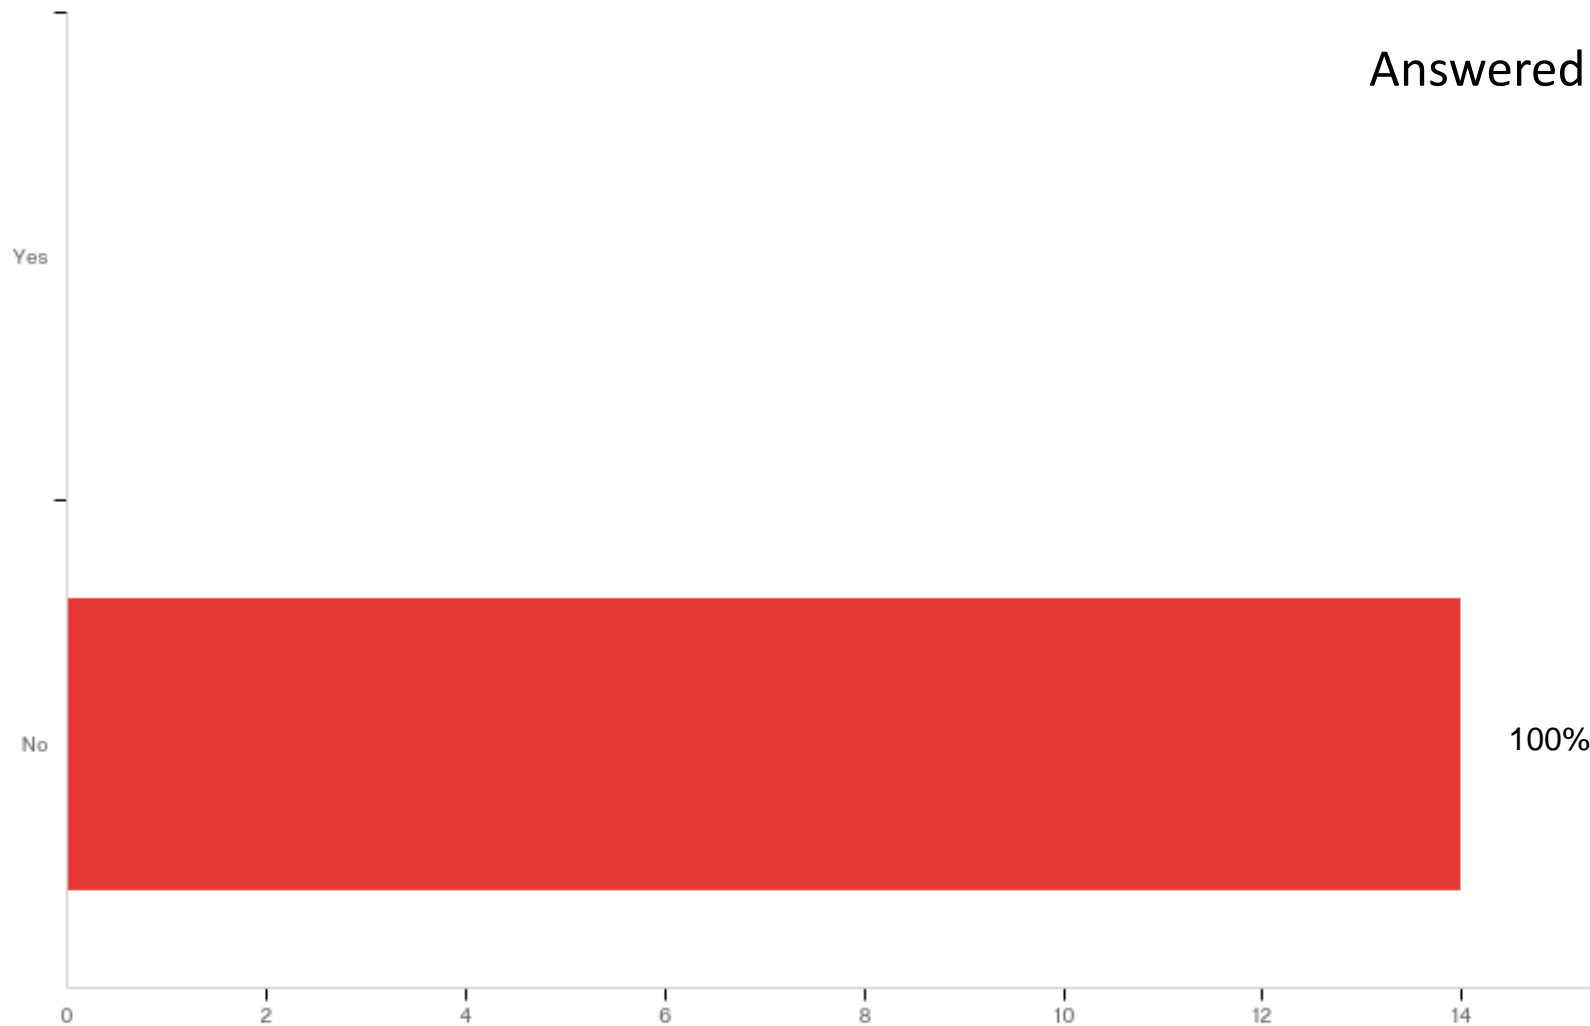

Answered: 9

Q37 - Do you have existing policies in your city that determine how your auxiliaries are powered?

Answered: 14

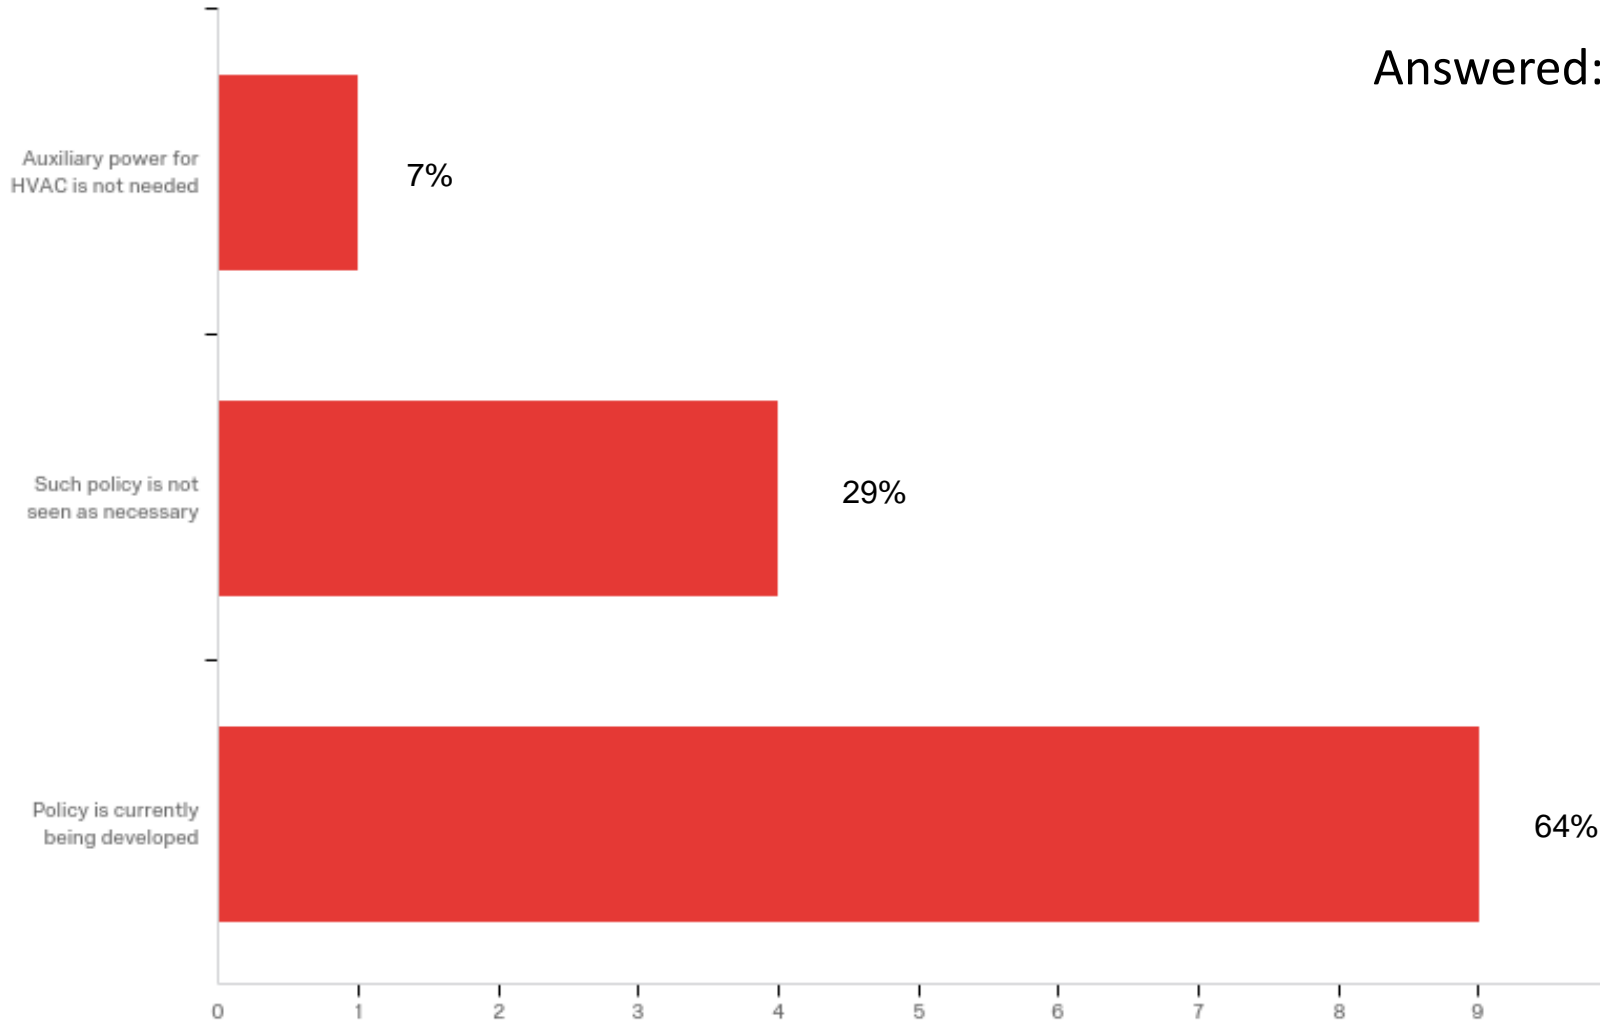

# Q38 - What electric auxiliaries (heating, ventilation, AC) does local policy in your city/region allow for?

# Q40 - Why do such policies not exist?

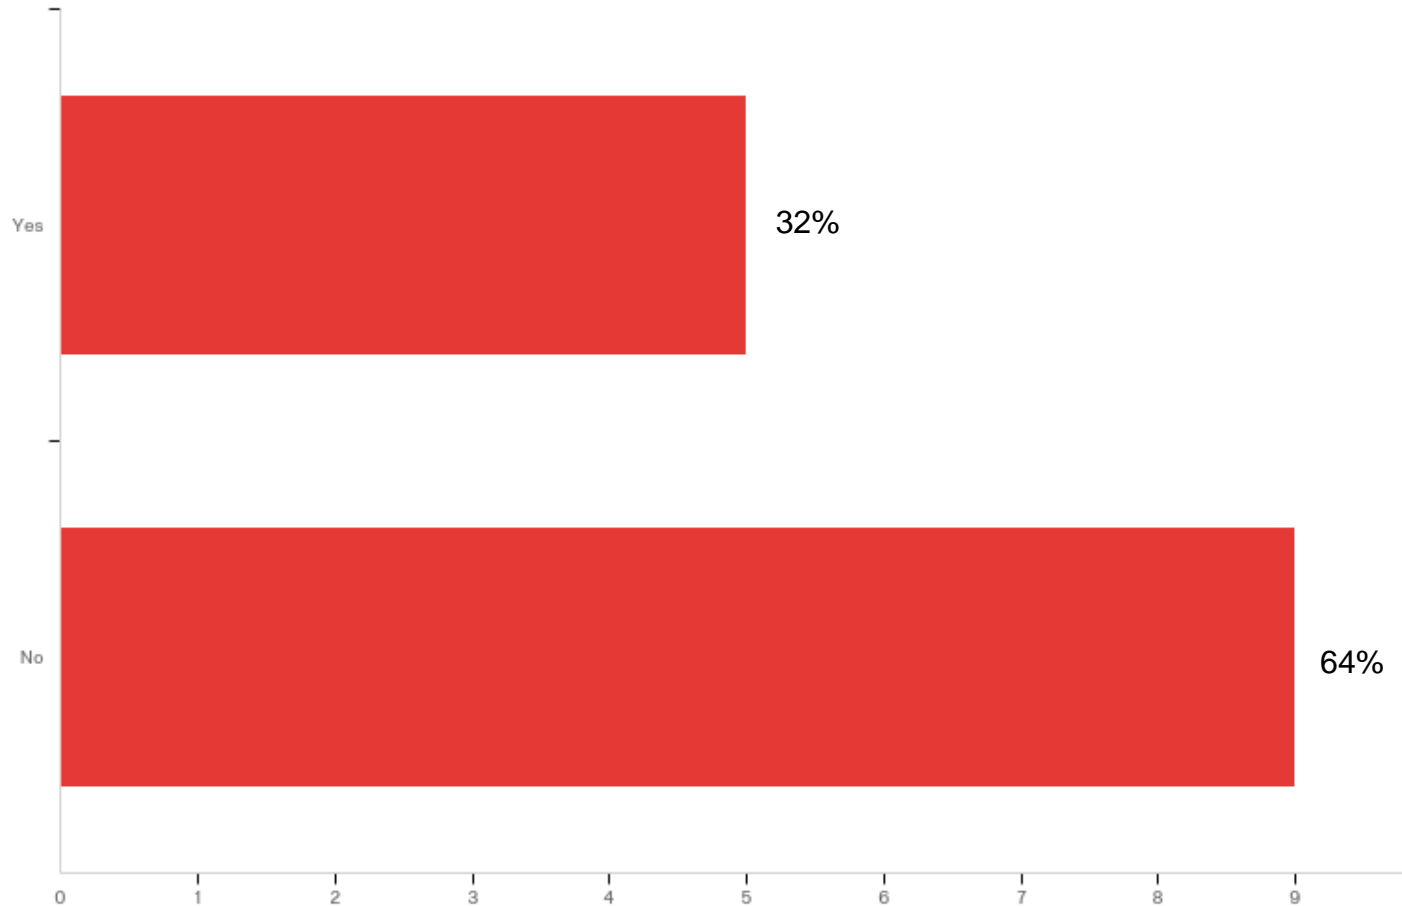

Answered: 14

Q41 - Would the requirement for zero-emission buses (i.e. including electric auxiliaries) be a deal breaker to scaling up to a fleet of e-buses in your city?

Answered: 14

*Thank you for the attention*
